

Central Intelligence Agency

Washington, D.C. 20505

OLL 84-2167/2
15 June 1984

The Honorable Orrin G. Hatch, Chairman
Committee on Labor and Human Resources
United States Senate
Washington, D.C. 20510

Dear Mr. Chairman:

I am sorry to report that your letter of 9 May did not arrive at the Agency until 29 May 1984. We will make available for Dr. Pillsbury through the Senate Select Committee on Intelligence those publications we forward to the National Science Foundation. Over the past year, we have provided six such reports:

Soviet Reusable Space Transportation System

Increasing International Competition for Space Products and Services

Soviet Ballistic Reentry Vehicle Configurations and their Performance Implications

Soviet High Pressure Physics Research and Applications

The Soviet Oceanographic Research Program

Soviet Directed-Energy Weapons: An Overview.

There is also one additional classified title in the same general area of concern and two publications requiring special approvals for release that I expect to make available to Dr. Pillsbury.

The Monthly Reviews you mentioned are not finished intelligence. We will, however, make available (again through the Select Committee on Intelligence) those articles in the Reviews that are not originator-controlled and that appear relevant to your concerns.

We would also be most pleased to provide you and Dr. Pillsbury a briefing on international labor issues in preparation for your participation in the ILO annual meeting later this month.

Sincerely,

[Redacted Signature]
